Sample Employee Handbook

Purpose

This sample document is included so the RAG chatbot has a PDF to read immediately. Replace it with your own text-based PDF named document.pdf.

Leave Policy

Employees should submit planned leave requests to their manager in advance. Emergency leave should be communicated to the manager as soon as practical. The exact leave entitlement is defined by the employer's official policy.

IT Support

For access or laptop issues, employees should contact the internal IT support desk and provide a brief description of the issue, the device name, and any error message. Passwords and API keys should never be included in support tickets.

Information Security

Employees must protect confidential information, use approved tools, and avoid uploading internal documents to external services unless permitted by company policy.
